PROFESSIONAL SUMMARY

iOS Developer with 2+ years building Swift and SwiftUI applications - 3 live products in production before graduating: [Rise of the Lich King](#) and [Boraa](#) on the App Store, plus **odinPedidos** (B2B ERP, 50+ paying clients) on both stores. Applies MVVM, MVC, and SOLID principles to write clean, testable, maintainable code with **XCTest** and Swift Testing. Comfortable with **Git, pull requests, and code reviews** in collaborative teams. Fluent English (B2, academic experience in London) -- ready to work fully remotely with global teams from day one.

CORE COMPETENCIES

Swift / SwiftUI / UIKit	iOS App Development	SOLID Principles	Unit & UI Testing (XCTest)
MVVM / Clean Architecture	App Store Connect & TestFlight	Git / Code Reviews	CI/CD Pipelines

WORK EXPERIENCE

Apple Developer Academy | PUCRS

Feb 2025 -- Present

iOS Developer -- Porto Alegre, Brazil

- Shipped **2 apps to the App Store**: [Rise of the Lich King](#) (iOS game, 100 downloads in first week -- sole developer, end-to-end) and [Boraa](#) (social event app, team of 5 -- backend, MapKit integration, frontend screens).
- Built native iOS apps in **Swift, SwiftUI, and UIKit** applying **MVVM, MVC, and SOLID principles** for clean, scalable codebases; wrote unit and UI tests with **XCTest and Swift Testing**.
- Implemented **Core Data, SwiftData**, external REST APIs, and **StoreKit 2** in-app purchases; used **TestFlight** for beta distribution and App Store Connect for release management.
- Achieved **3rd place out of 10 teams** at the PUCRS Software Engineering Hackathon (myRates, Swift/UIKit + Go) -- first team in the event's history to ship a native iOS app to TestFlight during the competition.

Plugways Digital

Jul 2023 -- Jan 2024

Software Development Intern -- Brazil (Remote)

- Built **odinPedidos** end-to-end -- a B2B ERP for sales rep order management serving **50+ paying clients**, live on App Store and Google Play. Sole mobile developer: architecture, all screens and CRUD flows, REST API integration, and both store deployments.
- Configured iOS capabilities, push notifications, and permissions from scratch using **React Native, Expo, and TypeScript**.
- Contributed to **code reviews** and cross-platform web projects (Angular, PHP, Node.js, AWS).

GPSET Engenharia

Jan 2024 -- Feb 2025

Software Engineering Intern -- Porto Alegre, Brazil

- Built a Power BI + Python dashboard integrating SAP data that reduced cost analysis from weeks to one day.
- Developed fullstack web apps (TypeScript, React, Node.js); contributed to CI/CD pipelines and DevOps workflows.
