Porto Alegre, Brazil

PROFILE

I design, build and publish iPhone apps. My work includes four products on the App Store - Palco, Rise of the Lich King, Boraa and odinPedidos - and both Freela onTap apps, listed for November 2026. I work across interface, implementation, testing and release.

SELECTED PRODUCTS

01

Palco: Oratória e Apresentação

RELEASED

Built this private speech rehearsal app end to end. Audio and transcription stay on the iPhone; measured speaking metrics support qualitative feedback. I used spec-driven development with Codex, Claude, skills and MCPs, reviewing decisions and results throughout (HITL).

Independent project | Swift 6, SwiftUI, on-device speech recognition

App Store

Freela onTap: Empresas + Vagas e Turnos

LISTED FOR NOVEMBER

Developed both sides of the shift marketplace. My work includes maps and distance search, onboarding and notifications. The App Store listings show availability expected on 16 November 2026.

Both iPhone apps | Swift 6, SwiftUI, shared codebase

Empresas Vagas e Turnos

Rise of the Lich King

RELEASED

Designed, built and submitted the game to the App Store. It reached 100 downloads during its first week.

iOS game | Swift, SwiftUI, StoreKit 2

App Store

Boraa

RELEASED

Contributed backend routes and deployment, MapKit integration and frontend screens for the social event app.

Team of five | SwiftUI, MapKit, REST APIs

App Store

odinPedidos

RELEASED

Built the order management app for sales representatives, from screens and REST integration to both store releases. It serves 50+ paying clients.

Sole mobile developer | React Native, Expo, TypeScript

App Store

Experience & foundations

ANTHONY ANTONELLI

EXPERIENCE

02

iOS Developer

Feb 2025 - present

Apple Developer Academy | PUCRS

- Published Rise of the Lich King; 100 downloads in its first week. On Boraa, worked with a five-person team on backend deployment, MapKit and interface screens.
- Placed third of ten teams at the PUCRS Software Engineering Hackathon with myRates, delivered through TestFlight during the event.

Software Engineer

Jan 2024 - Feb 2025

GPSET Engenharia

- Connected SAP and equipment data to Power BI through a Python pipeline, reducing cost analysis from one week to one day.
- Built and maintained React and Node.js applications used by more than 25 people to plan work.

Mobile & Backend Developer

Jan 2023 - Jan 2024

Plugways Digital

- Built odinPedidos as the sole mobile developer. It is on the App Store and Google Play and serves 50+ paying clients.
- Implemented screens and REST integration, configured iOS capabilities and push notifications, and handled both store submissions.
- Built backend services with PHP, Node.js and MySQL, web interfaces with Angular, and managed AWS deployments.

TECHNICAL PRACTICE

03

APPLE	Swift 6, SwiftUI, UIKit, MapKit, StoreKit 2, Core Data, SwiftData
MOBILE & WEB	React Native, Expo, TypeScript, React, Node.js, REST APIs
WORKFLOW	Git, code review, TestFlight, App Store Connect, Figma; spec-driven development and HITL with Codex, Claude, skills and MCPs

EDUCATION & LANGUAGES

04

B.Sc. in Software Engineering

2024 - 2027

PUCRS, Porto Alegre

Apple Developer Academy | PUCRS

2025 - 2027

Portuguese: native | English: B2 (Bayswater College, London, 2022)

Technical degree in Computer Science, EEEP Dr. Solon Tavares (2021 - 2023)
